

What is just Oxy???

just Oxy is a versatile, non-chlorine oxygen bleach for those who care about the safety of their family and their planet. Just Oxy contains sodium per carbonate, a solid form of hydrogen peroxide, bonded with natural soda ash. It contains the highest level of oxygen bleach available compared to other nationally known oxygen bleaches. *just Oxy* is activated by water where it releases oxygen; this provides the cleaning and stain removal. The oxygen attacks the organic stain, breaks it down and lifts it from the surface.

Why use just Oxy???

- It out performs the leading brands of oxygen bleach.
- Non toxic, user safe and environmentally friendly.
- Safe on all colors
- Safe in all temperatures (works best in warm/hot water)
- Safe on all washable fabrics (not suitable for silk or wool).
- Performs in hard or soft water
- Creates no harmful by-products upon decomposition.
- *just Oxy* is manufactured in the United States.

Please read all cautions before using this or any other cleaning product!

CAUTION: *First Aid:* In case of ingestion, give large amounts of water or milk to dilute and seek medical help immediately. Do not induce vomiting. *just Oxy* contains sodium per carbonate. ***In case of eye contact,*** flush with plenty of water for 15 minutes and seek medical attention.

AS WITH ALL CLEANING PRODUCTS KEEP OUT OF REACH OF CHILDREN AND PETS!!

For best results: Test for colorfastness by first applying solution to an inconspicuous area and allow it to dry.

Do not leave diluted solution in a sealed container as *just Oxy* will continue to give off oxygen and the container may leak. *just Oxy* solution will remain active for up to 6 hours.

just Oxy has so many different uses, that we wanted to make sure you had the information needed to start using **just Oxy** immediately. Remember, **just Oxy** is safe. It is color safe, fabric safe, user safe, environmentally safe, and it is an excellent deodorizer. It will remove organic stains as tough as red juice, blood, wine, pet stains and more.

Four keys to just Oxy Cleaning

- TIME.....**
The longer that **just Oxy** is in contact with the article being cleaned, the better it will work. Wait at least the recommended amount of time for Just Oxy to clean your fabric or surface.
- TEMPERATURE.....**
The hotter the water the used to dilute **just Oxy**, the better it will clean. Use the hottest tap water that the fabric or surface can tolerate. Do not use boiling water.
- CONCENTRATION.....**
The more concentrated the **Just Oxy** solution, the better it will clean. See the chart for recommended usage. Feel free to experiment.
- AGITATION.....**
The better the agitation or

Legend:	just Oxy	Hot Water
Solution 1	2 oz.	1 gallon
Solution 2	4 oz.	1 gallon
Solution 3	6 oz.	1 gallon
Solution 4	8 oz.	1 gallon
Solution 5	1 Tbl.	8 oz.

Laundry:
Add **just Oxy** to your laundry with your detergent as follows:

- Light soil: 1 oz./load
- Moderate soil: 2 oz./load
- Heavy Soil: 4-6 oz./load

Tips for usage:
On heavily stained garments use solution 2, soak overnight then launder as usual.

On extremely stained items (ie; cloth diapers); to whiten, destain and deodorize, first run through pre-wash cycle to remove soil. Then run a hot water cycle, adding 4-6 oz. **just Oxy** to laundry detergent. Soak at least 1 hour up to overnight; after soak complete wash cycle.

Carpet & Upholstery:
Use spray solution. Spray onto stain until wet. Leave 20-30 minutes, spraying occasionally to keep surface dampened. Blot with clean cloth or towel and allow surface to dry. **If carpet; vacuum clean area when dry.**

just Oxy can be used as a booster with existing carpet shampoos and detergents to increase cleaning power and stain removal. Add 2-4 oz **just Oxy** per five gallons of water/ detergent (shampoo) solution just before use.
